

Introducing FSQS

How Hellios & ABN AMRO Bank collaborate with 15 financial institutions to simplify supplier risk assessments

Our purpose is to contribute to a better world by **building confidence** in supply chains

Founded in 2012, Hellios has grown to:

Over
100
Employees

Offices in
6
Countries

Over
150
Customers

Over
15.000
Suppliers

How does our community model work?

- Suppliers & third parties complete a single profile on the Hellios system that is shared with all participating financial services organisations.
- Hellios collect, validate and monitor supplier information.

Global expertise tailored to local requirements

We know when it comes to supplier compliance one size doesn't fit all. Which is why we are committed to creating Financial Service communities tailored to local regulations, governed by those using the data.

United Kingdom and Ireland

The Netherlands

Spain

Nordics

The FSQS-NL Community

10 Dutch financial service providers have joined in the last 18 months in response to increasing regulatory requirements such as: DORA, CSRD and CSDDD.

What challenges do we address?

Access to essential supplier data, decreasing the stress and burden on your team.

A local team to support suppliers and validate the data before publishing.

A community of peers to share experiences on regulatory challenges.

The Assessment Process

Our system collects both organisational & service specific data from suppliers for their Buyers.

Stage 1

Profiling Questionnaire

Low Risk Profile

Low risk suppliers stop at Stage 1

Medium/High Risk Profile

Higher risk suppliers advance to Stage 2

Stage 2

Compliance Questionnaire

High Risk Profile

Sections in grey are conditionally triggered by Stage 1 answers

SSQs

Service Specific Questions
